

“In the first 12 months after completing my Life Plan I worked approximately 4 weeks (four weeks) and made my goal of 5X my previous income. That was more than \$500,000 - exactly per my Life Plan.

Demand for my company’s services came from everywhere.

For the second year I am on target to make at least 10X my earlier income. The funny part about it is that it is so easy. My goals, my wife’s goals and the goals of many people around me are being achieved. It’s wonderful. Correctly done the Life Plan program is a truly powerful tool.”

Best Regards,
Greg Kingdon, Director
Kaltech International Pty. Ltd.
Salt Lake City, Utah, USA
A mining services company

“I was working in excess of 100 hours each week. My company had sales of \$3 million per year and we had 17 employees covering Melbourne and Sydney. The company was growing but it was beginning to struggle.

Consulting began with Life Plans for my business partner and me. This was followed by full company planning along with Life Plans for other executives. We also had regular, weekly consultant assistance to help us achieve the company plans we had set.

Over the next two years or company grew to 150 staff in three states with annual sales of \$30 million. I also had time for many other things besides working.”

Gareth Jekel, Managing Director, New Systems Refrigeration

Gareth Jekel, at age 24, won the Young Australian Business Achiever of The Year, presented by the Prime Minister, John Howard.

“I always intended to strive hard for a better life. It was very hard for me to validate myself, instead I suffered setbacks over feelings of incompetence and lack of confidence.

After studying the Life Planning I finally found the person I was meant to be. I felt a surge of relief in my heart that I had never felt before.

I could take a load off my mind, which had been sitting there for over 20 years, and looked back on my life, wondering why I worried about trifles.

I now feel that I can be myself for the first time.

I will move on my life toward my goal, and keep working so that I can make other people more confident and lead a happy life. Thank you very much.”

Masae Oyaizu
Vice President, Oyaizu Tea Company
Shizuoka, Japan

“To be aware of your basic purpose in life is truly a good thing.

My consultant guided me through a journey of discovery that helped me become aware of my basic purpose – or why I am here. This happened more than three years ago.

Since the time that I gained the knowledge of my basic purpose I have had a reference point from which to evaluate aspects of my work life, my family life and my personal life. I have gained much from this, both economically and in terms of personal happiness. I know now that if I am not winning or feel unhappy I am probably not on track with my basic purpose.

I am now able to “stand back” and, with awareness of my basic purpose, understand what I can do that will really make a contribution for others and for myself.”

Bernie Cooper
Chief Executive Officer, Enetech
(Enetech is an engineering services company of 1500 employees.)

“While doing the “Life Planning” my attention was brought back to myself rather than going along with my day to day activities. It was great to have a goal and having someone who is skilled in assisting me to find it. It not only addressed my career path but also what I wanted to do personally. Not only in business but in life and family, it made me look at the whole.

Following the Life Planning our business grew from one gift shop to buying another one and then another and our business profits have tripled since then.

Before I was always a bit hard on myself – everything had to be excellent. Now I am more realistic and relaxed and know that I am a good business owner, a good mother and a good daughter etc.

We have achieved a very good reputation in our industry. I have achieved all that I wanted to and it is now time to re-evaluate the future again. We have paid off our house (worth well over \$1 million), our children go to a private school, I do not have to worry about money. All this came from doing the Life Plan.”

Deborah George, Owner Gift Shop Chain

“It is now 6 months since I completed my “Life Plan” program. The two other senior executives in our company did the same action.

Before, whenever I made a major decision I would worry. I had constant doubts about whether I was doing the right thing.

I can now do the things I decide to do without doubt. Now, if I decide something I no longer experience confusion.

All my fellow executives now share the same idea and the same vision for the future. We all agree on the exact steps to take to expand our company. Before we did not agree and working together was often difficult.

It is surprising to me just how easily our company is growing. We are achieving highest statistics month after month.”

Mayuko Ikeda, Director, Chubu Nihon Plastics,
Hamamatsu Japan.

“In the beginning our business was very confused. We worked very hard but we were not efficient. We had no policy, We had very bad quality problems and we wasted a lot of money. We did not have clear roles so everyone tried to do everything. We had disagreements. I was not always sure that I wanted to continue in the business.

Now we have worked out our personal and company plans, for the first time, everyone can see who we are and what we are and where we are going. It not only tells us what we must do to attain our goals but, perhaps more importantly, it tells us what we must NOT do.

By having all our plans laid out and coordinated we can see what must be done and what CAN be done to achieve our plans. We now work together as a COORDINATED group.

Before we were efficient INDIVIDUALS. Now, with the company plans, we are a TEAM. It feels just so much better.”

Frank Yap, Executive Director, Insato Furniture
